Endpoint Operations Done! Efficiently.

SERVER MIGRATION

Our Server Migration service offers comprehensive assistance for migrating your current On-Premise server to either Debian Linux (On-Premise) or to our Cloud Hosting environment. A dedicated Professional Services engineer will guide you step-by-step through the migration process, ensuring a smooth transition and minimal disruption to your operations.

The cost of the Server Migration service is $1,000 USD. This one-time fee covers the entire migration process, including post-migration support.

THE PROCESS

✓ **Discovery Call**
A Professional Services Engineer will schedule a discovery call with you to create a migration plan tailored to your needs and requirements.

✓ **Migration Call**
During the migration call, our engineer will assist you in moving your server to the new environment, whether it is Debian Linux run On-Premise or our cloud hosting environment.

✓ **Post-Migration Support**
After the migration is complete, our team will provide post-migration support to handle any issues and ensure that your new server is running smoothly.

Whether you are considering migrating to Debian Linux (On-Premise) or to our Cloud Hosting environment, our Server Migration service offers a seamless and reliable solution. Our Professional Services Engineer will work closely with you to ensure a successful migration that meets your business objectives.
