Who is FileWave

FileWave offers complete management capabilities for all macOS/Windows computers, iPadOS/tvOS/Android mobile devices, along with an additional reach to Chromebooks.

By reducing the number of management tools, FileWave centralizes visibility, reduces complexity, enhances security, and empowers productivity.
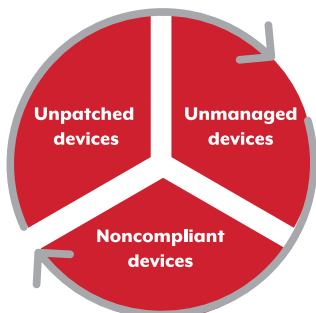

Key Components (All-Inclusive)

A MANAGED DEVICE IS A MORE SECURE DEVICE

ALL NETWORKS HAVE VULNERABILITES

TOP 4 CHALLENGES WE HEAR FROM IT

Unpatched devices | Unmanaged devices | Noncompliant devices

1. I need to manage a growing and complex device environment

2. I need a way to track my assets - where are they located, how are they configured, and what is installed on them?

3. My staff spends too much time troubleshooting and I need an easier way to detect and remediate issues on/off network.

4. We have too many management tools to manage Microsoft, Apple, & Google devices and I need to centrilize my teams efforts.
