

Embed WiFi in EMM Enrollment QR

If you have a Google Policy Fileset with Network information in it. You can select it when you generate a QR code. This inserts the information onto the device for easy enrollment.

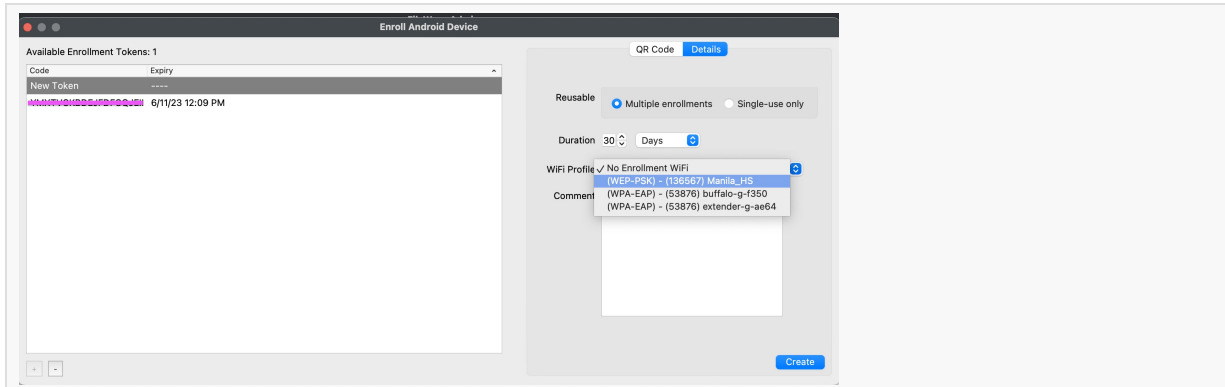

Figure 1.1 - WiFi selected in enrollment QR

Steps

1. Generate a Google Policy for Network ([Android EMM Policies and Permissions](#))
2. Generate a new Enrollment QR
 1. Assistant menu → Enroll Android Devices...
 2. Hit the [+] in the bottom left
 3. Choose a WiFi Policy from the drop down
3. Enroll a device as normal ([Quickstart Guide for Android EMM](#))

Most devices running Android 8+ come with a built-in QR reader app. Older devices will often need to connect to WiFi after the seven taps to then download QR app.

i The QR code that is generated contains the WiFi password in plain text.

⚠ DO NOT leave the QR code just sitting around.
