# FileWave Discord Server

Everyone who uses FileWave appreciates learning more about it and being able to discuss ways of using it with other customers. For that reason, we also run a Discord server that can be accessed via the button below. Look forward to live events with demos and training for all and AMA sessions.

Step 1: Join Discord

Don't know what Discord is? Discord describes itself this way: "Imagine a place where you can belong to a school club, a gaming group, or a worldwide art community where just you and a handful of friends can spend time together. A place that makes it easy to talk every day and hang out more often." It's very popular as a chat platform and very community driven. Below is an excellent video to explain how to use it.
