

# 1.4 Switching Between Dashboards

## What

Switching between various dashboards is the first thing you are going to want to do once you login.

## When/Why

Switching between various dashboards allows you to look at different types of data in different ways. I may want to open new browser tabs with different content, I may want to switch between views in the same tab. Or, I may even want the singular tab to cycle through content for me on its own (called a playlist).

## How

We'll start simple here, and just discuss switching between different dashboards. The easiest way is to simply use the header links to switch as shown below:

Note that there are other methods too...such as Dashboards→Manage:

[New Dashboard](#) [New Folder](#) [Import](#)

[Filter by Starred](#) [Filter By Tag](#)

<input type="checkbox"/>	 FileWave	
<input type="checkbox"/>	 Alerts FileWave	<a href="#">filewave</a>
<input type="checkbox"/>	 Apache FileWave	<a href="#">operations</a>
<input type="checkbox"/>	 Applications FileWave	<a href="#">patching</a>
<input type="checkbox"/>	 Associations FileWave	<a href="#">filewave</a>
<input type="checkbox"/>	 Boosters FileWave	<a href="#">filewave</a>
<input type="checkbox"/>	 Certificates FileWave	<a href="#">filewave</a>
<input type="checkbox"/>	 Configured FileWave	<a href="#">filewave</a>
<input type="checkbox"/>	 Deployment FileWave	<a href="#">patching</a>
<input type="checkbox"/>	 FileWave System FileWave	<a href="#">filewave</a>
<input type="checkbox"/>	 Grafana FileWave	<a href="#">operations</a>
