

Importing a Grafana Dashboard

What

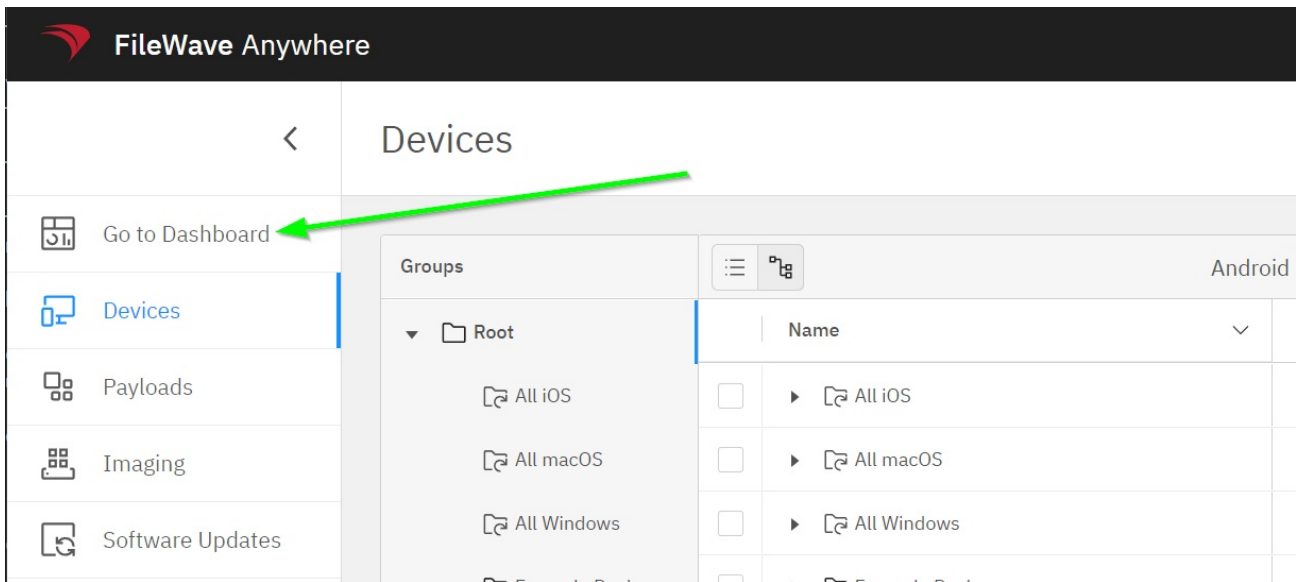

There's no need to build a grafana dashboard from scratch if you can "borrow" one from a friend. This article explains how to import a grafana dashboard from another system.

When/Why

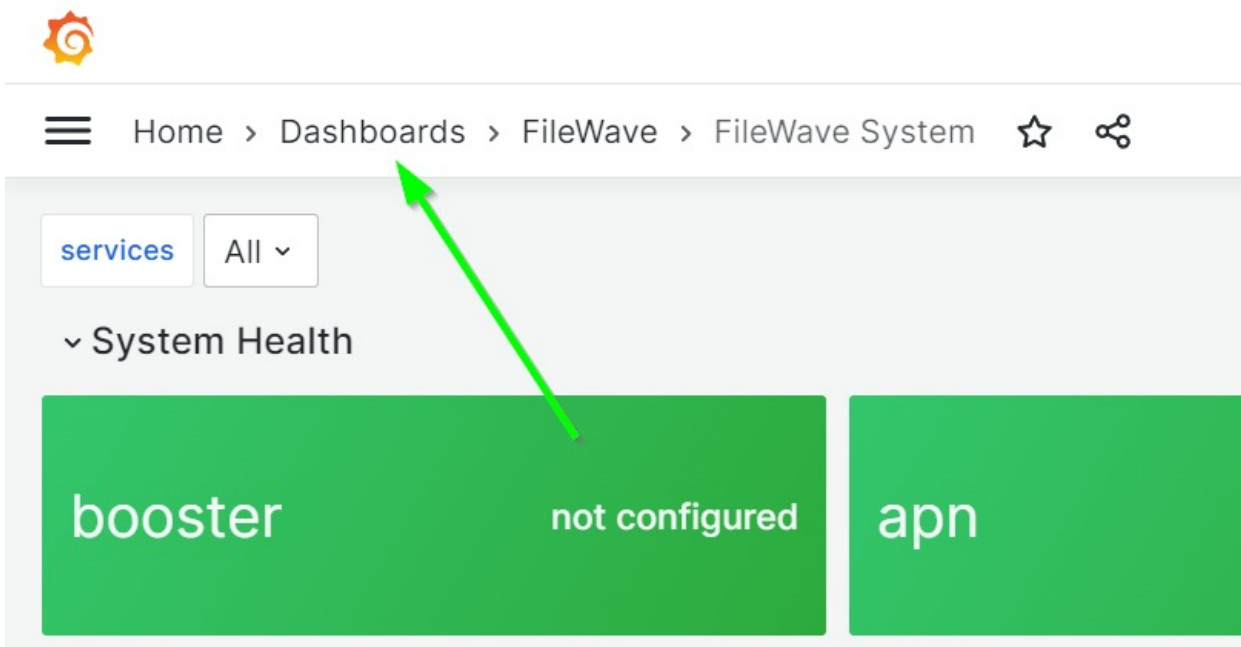

We'll want to import a dashboard whenever someone else has done the work for us, and we'd like to have a dashboard the easy way.

How

The steps are actually quite simple...from FileWave Anywhere, Go To Dashboard:

Within the dashboard, go to Home> Dashboards:

Then to New, Import:

And then either import the JSON file or copy and paste the JSON content:

Import dashboard

Import dashboard from file or Grafana.com

Upload dashboard JSON file

Drag and drop here or click to browse

Accepted file types: .json, .txt

Find and import dashboards for common applications at grafana.com/dashboards

Import via dashboard JSON model

```
{  
  "title": "Example - Repeating Dictionary variables",  
  "uid": "_0HnEoN4z",  
  "tags": [  
    "example"  
  ],  
  "panels": [  
    {  
      "title": "Panel 1",  
      "type": "text",  
      "content": "Panel 1 content"  
    },  
    {  
      "title": "Panel 2",  
      "type": "text",  
      "content": "Panel 2 content"  
    }  
  ],  
  "templating": {  
    "list": [  
      {  
        "name": "Variable 1",  
        "type": "text",  
        "value": "Value 1"  
      },  
      {  
        "name": "Variable 2",  
        "type": "text",  
        "value": "Value 2"  
      }  
    ]  
  }  
}
```

Now just set a name and a destination (note: every dashboard must have a unique UID):

Import dashboard

Import dashboard from file or Grafana.com

Options

Name

Environment Overview

Folder

Dashboards

Unique identifier (UID)

The unique identifier (UID) of a dashboard can be used for uniquely identify a dashboard between multiple Grafana installs. The UID allows having consistent URLs for accessing dashboards so changing the title of a dashboard will not break any bookmarked links to that dashboard.

a63a71c0-d78d-42ff-b1c1-aff76ad734f9

Change uid

Import

Cancel

And that is it, our new dashboard is imported:

Overall Status
