

Columns Sorting & Moving

What

Once we have customized a table view to contain the columns we want, it makes sense for us to want to order the data in the table and to order the columns themselves. Both of these are possible in the FileWave WebAdmin.

When/Why

Generally we will want to re-order and sort columns to make data in tables more meaningful to us. As an example, if I am looking at a table with FileWave Client Version in it, then I am probably going to want to sort that table by FileWave Client Version ascending (the up arrow indicates ascending) because what I really care about are old clients and fixing them:

The screenshot shows the FileWave Admin interface. The main content area displays a table titled "FileWave Client Version" with 8 devices. The table is sorted by "FileWave Client Version" in ascending order, as indicated by an upward-pointing arrow in the column header. The table has three columns: "Device Name", "FileWave Client Version", and "Device ID".

Device Name	FileWave Client Version ↑	Device ID
ARKONE	13.2.2	586cd190a3dcd0f1ac0bac928...
DESKTOP-T3SL66S	13.2.3	0ed3f0718bd66a31eb908bca7...
macos 10.14	13.2.3	6d65ecc45cf025469482ed9c4...
Tony Keller MBPro	14.0.0	9645a3f545d5b6e2be974e8c...
FOUNDRY1	14.0.0	2816241a4fe310501731aa0e6...
Mateo's MacBook Pro	14.0.0	895b739a2096c17d511488b...
balazs-macpro	14.0.0	adb71b3dc20c8de27f937be8...
Super Duper Mac Redux	14.0.0	40412e86181489a666753b64...

How

As you will see in the below, sorting by columns is as easy as clicking on the column header, and order columns is as easy as drag and drop:
