

DEP Profiles

What

The DEP Profile section allows us to create, edit and remove DEP (Apple Device Enrollment) profiles.

When/Why

There are a lot of different reasons for creating and editing DEP profiles, but in general DEP profiles control device setup behavior for Apple devices. With these profiles we can control what dialogs users see during device setup, force devices to enroll in our MDM environment, and even control device naming. DEP profiles are a critical part of setting up automated device enrollment and setup.

How

The below is a quick run-through of creating (and editing) a new DEP Profile targeting AppleTV devices.

See the link below for more information on automatically assigning DEP profiles to devices.
