

# Editing Payloads / Payload Properties

## What

We can edit profile payloads in the WebAdmin, change payload properties for all other payload types and do some basic reporting in the Payload view.

## When/Why

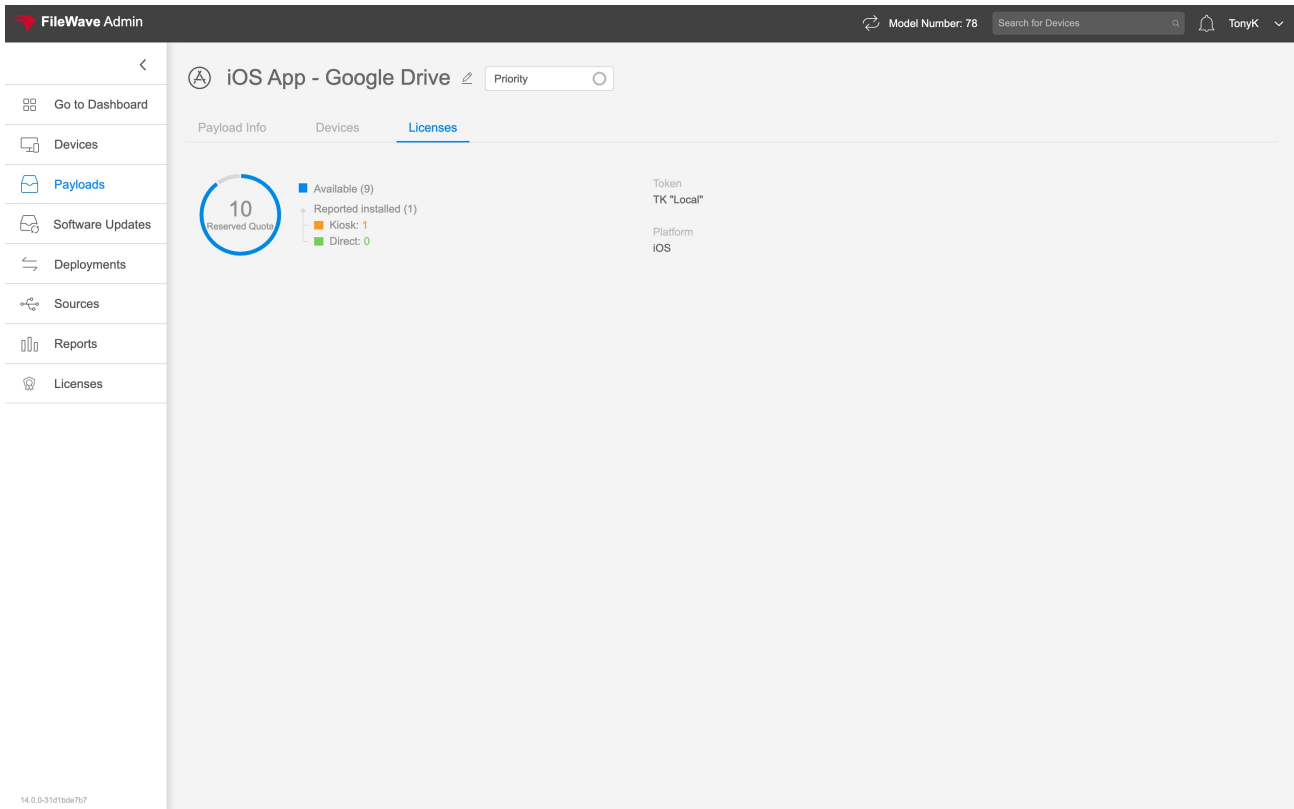

Editing a profile is straightforward, but we can do more than that in the payload view. We can also change payload properties of any payload, and report on distribution (which is especially useful).

## How

Clicking on any payload will bring up a detail payload view:

The screenshot displays the FileWave Admin web interface. The top navigation bar includes the FileWave Admin logo, a refresh icon, 'Model Number: 78', a search bar for devices, and a user profile for TonyK. A left sidebar contains navigation links: Go to Dashboard, Devices, Payloads (highlighted), Software Updates, Deployments, Sources, Reports, and Licenses. The main content area is titled 'FileWave\_macOS\_Client\_14.0.0\_38dbec200e' with a 'Priority' dropdown. Below the title are tabs for 'Payload Info' (selected), 'Devices', 'Platform Requirements', and 'Dependencies'. The 'Payload Info' tab shows a 'Deployment' status of 80% Completed, with a breakdown: Completed: 4, Remaining: 1, Warning: 0, and Error: 0. Below this is the 'Settings' section, which is divided into two columns. The left column contains 'Reboot Settings' (with options for 'Requires Reboot', 'Authenticated restart for devices', and 'Reboot Message') and 'Verification Settings' (with options for 'Keep synched (self healing)', 'Download only if missing' (selected), and 'Do not verify'). The right column contains 'Kiosk' settings (with a 'Choose a Payload icon' section and a 'Browse' button) and a 'Title' field. The 'Description' field is also present. At the bottom left of the interface, the version number '14.0.0-3161bde7b7' is visible.

This view will differ a little depending on the type of payload. See below that a VPP payload shows licensing info that you won't see on other fileset types:

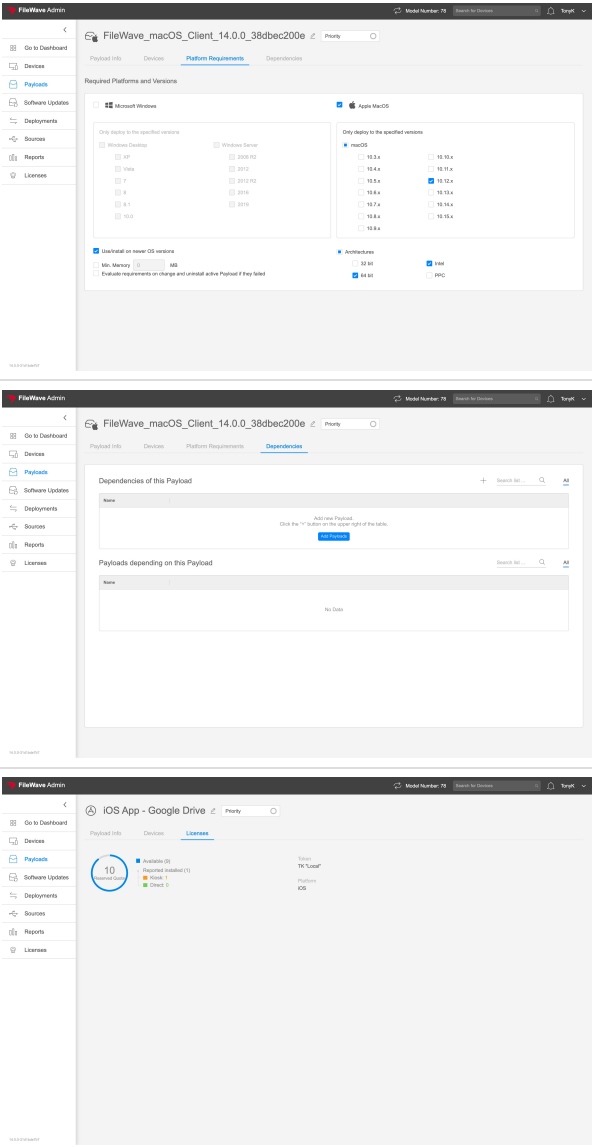

- 1 You'll note that in payload properties there is no "Save" button. All changes made to payload properties (like platform requirements) are immediately saved, and will become effective on next model update.

| <div>Payload Tab</div>                                                                                                                                                                       | <div>Example</div>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                  |                |         |             |                |      |       |                |        |                                  |   |  |    |                |                |          |                                  |   |  |    |                |                |        |                                  |   |  |    |                |                |        |                                  |   |  |    |                |                |        |                                  |   |  |    |                |

The Dependencies tab is where we specify relationships between payloads for simpler deployment.

For VPP payloads only you'll see a tab that shows licensing details
