

Report Conditions

What

Conditions are used to define what devices or other elements will show in the results of our smart group or report.

When/Why

We will almost always use at least one condition in a smart group or report (unless we wanted to see literally every device). The conditions allow us to refine the list down from "everything" to just specific devices, such as "Windows devices that have an older FileWave client".

How

Watch below as we specify criteria (conditions) to match our example above:
