

Review and Deploy Software Updates in FileWave Anywhere

What

The Software Updates view in FileWave Anywhere lists updates that managed devices currently report as needed. Use it to review affected devices, inspect update status, install an update on selected devices, or configure automatic deployment.

When/Why

Check this view when you need to answer which devices still need an Apple, Microsoft, or third-party software update.

How

The list changes as devices submit inventory and update status. The screenshot below shows an older FileWave Anywhere layout; current columns may differ.
