

Search Criteria

What

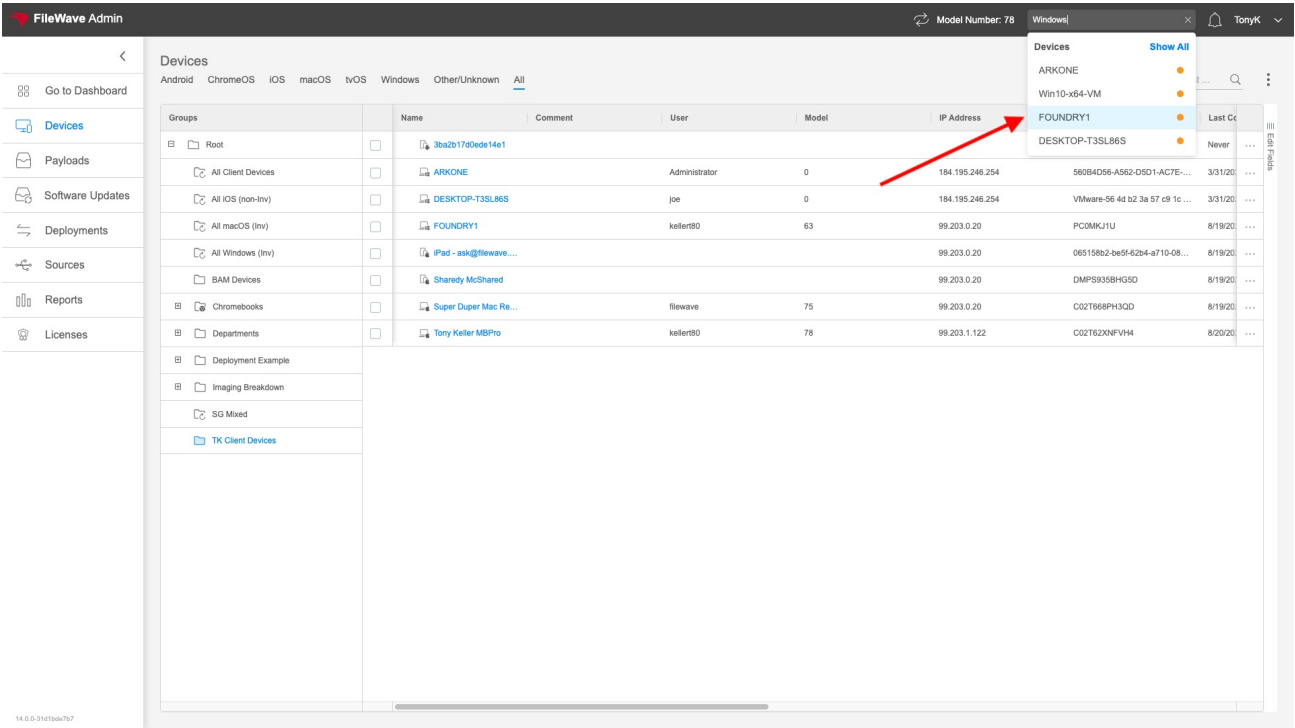

The general upper-right Search tool () will search for devices from within any view in the FileWave WebAdmin.

When/Why

We'll use this tool to quickly get to any device, from anywhere within the admin for those quick one-off support types of issues. We'll be adding more functionality to this search function over time.

How

To search for a device, you can use the most common field values, such as device name, operating system name, and current username to isolate devices. Once the list appears, click on the device name to go to the device detail view:

The screenshot shows the FileWave Admin interface. On the left is a sidebar with navigation links: Go to Dashboard, Devices, Payloads, Software Updates, Deployments, Sources, Reports, and Licenses. The main area is titled 'Devices' and has tabs for Android, ChromeOS, iOS, macOS, tvOS, Windows, Other/Unknown, and All. A search bar at the top right of the main area contains the text 'Search for Devices'. Below the search bar, a dropdown menu is open, showing a list of devices: ARKONE, Win10-x64-VM, FOUNDRY1 (highlighted), and DESKTOP-T3SL86S. A red arrow points from the 'FOUNDRY1' entry in the dropdown to the 'FOUNDRY1' entry in the main table. The table has columns: Groups, Name, Comment, User, Model, IP Address, and Last C... (Last Connected). The table lists several devices, including '3ba2b17d0ede14e1', 'ARKONE', 'DESKTOP-T3SL86S', 'FOUNDRY1', 'iPad - ask@filewave...', 'Shareddy McShared', 'Super Duper Mac Re...', and 'Tony Keller MBPro'.

Departments	Tony Keller MBPro		keller80	78	99.203.1.122	C02T62XNFFVH4

Currently, this search does not search against additional fields that you have added to the client view, but we will be making improvements on this in future.
