# View - Devices Overview

What

The Devices View (   ) is where you will work with all of the devices that are enrolled in FileWave, and also where you can choose to enroll new devices.

When/Why

You will use this view whenever you want to see specific information about a particular device, whenever you want to manage/see devices that are in groups and smart groups, and whenever you want to dig a little deeper in troubleshooting.

How

From this top level Device view, you'll be able to do all of the items listed below. Check out the articles in this book to go into depth on each topic.
