

# What languages does FileWave support?

## What

FileWave is a Unified Endpoint Management tool that allows users to manage and deploy updates to macOS, Windows, iOS, iPadOS, tvOS, Chrome, and Android devices. It is used by a variety of organizations, including educational institutions, corporations, and state and local governments around the world.

## When/Why

It is important to know the languages that FileWave is natively in because it can help users understand the tool and its features more effectively. For example, if a user is more comfortable with a certain language, they may prefer to use the FileWave interface in that language. Additionally, knowing the native languages of FileWave can help organizations decide whether the tool is a good fit for their needs based on the language preferences of their staff or users.

## How

FileWave is natively in:

Language	Locale Code	Notes
English (US)	en_US	Use for American English.
German	de_DE	Standard locale for German in Germany.
French	fr_FR	Standard locale for French in France.
Korean	ko_KR	Korean for South Korea.
Japanese	ja_JP	Japanese for Japan.
Chinese (Simplified)	zh_CN	For Mainland China.
Chinese (Traditional)	zh_TW	For Taiwan.
