

Moving the App Portal Web Clip using the Home Screen Layout Payload

FileWave no longer deploys a Web Clip version of the FileWave App Portal. The new version 2 Kiosk App's Bundle ID is: com.filewave.ios.app.kiosk2

Device Name: iPad001
Device Type: iPad
Last Connected: 2025/2/7 08:46
iOS Version: 16.7.10
Enrollment Type: DEP Enrollment

Export Current Tab

Filesets Status Device Details Command History Managed Apps **Installed Apps** Managed Documents Installed Profiles

Identifier	Name	Version	Short Version	Bundle Size	Dynamic Size
com.filewave.ios.app.kiosk2	App Portal	15.5.2	15.5.2	25.5 MB	1.3 MB

For the new App, it may be referenced in a Home Screen Layout Payload by this Bundle ID:

com.filewave.ios.app.kiosk2

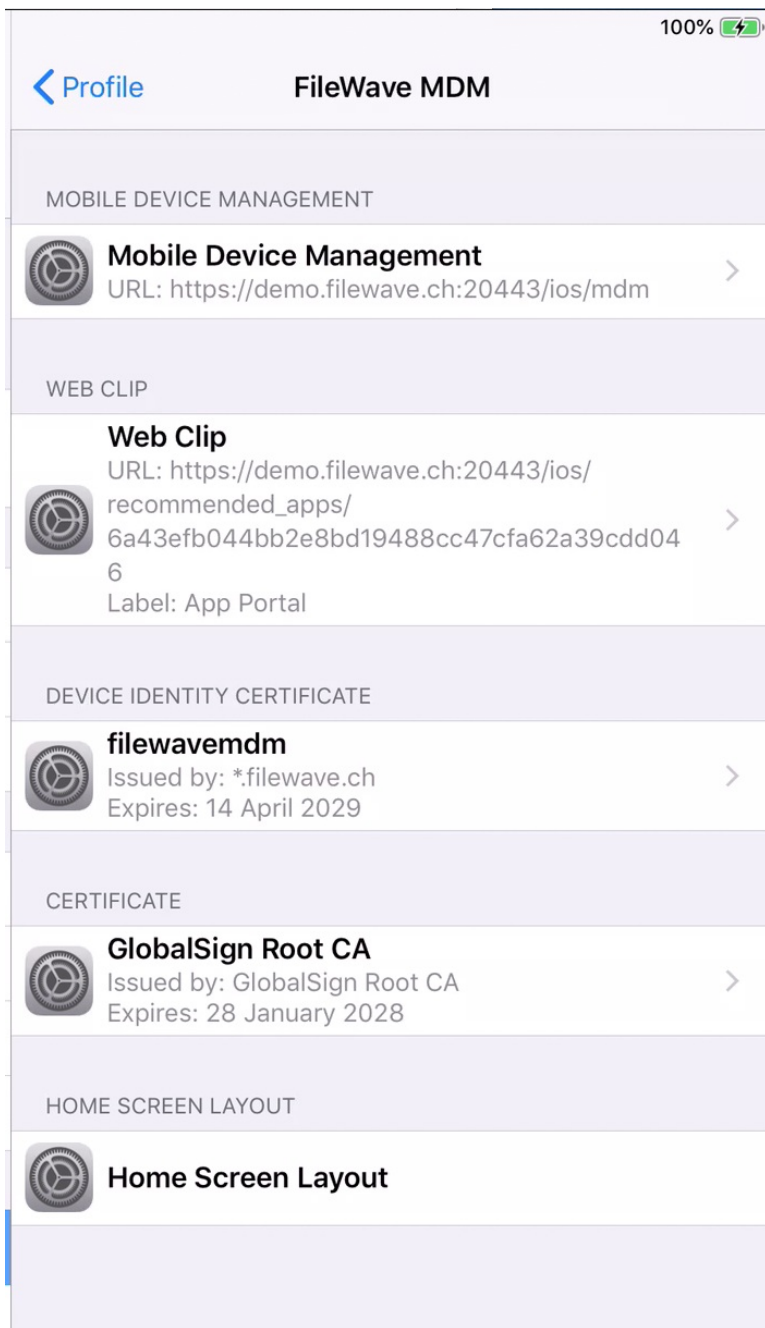

com.filewave.ios.... Bundle Identifier com.filewave.ios.app.kiosk2

⚠ The below method for the Web Clip App Portal is legacy and will be removed from our KB at a later date.

To move the App Portal Web Clip using the Home Screen Layout Payload, locate the URL of the web clip from any iOS device settings:

- Settings App > General > Device Management > FileWave MDM > More Details

"Web Clip" as seen below:

The Web Clip address shown should be injected into the Home Screen Layout Payload, replacing the long string of characters and numbers at the end with %device_id% .

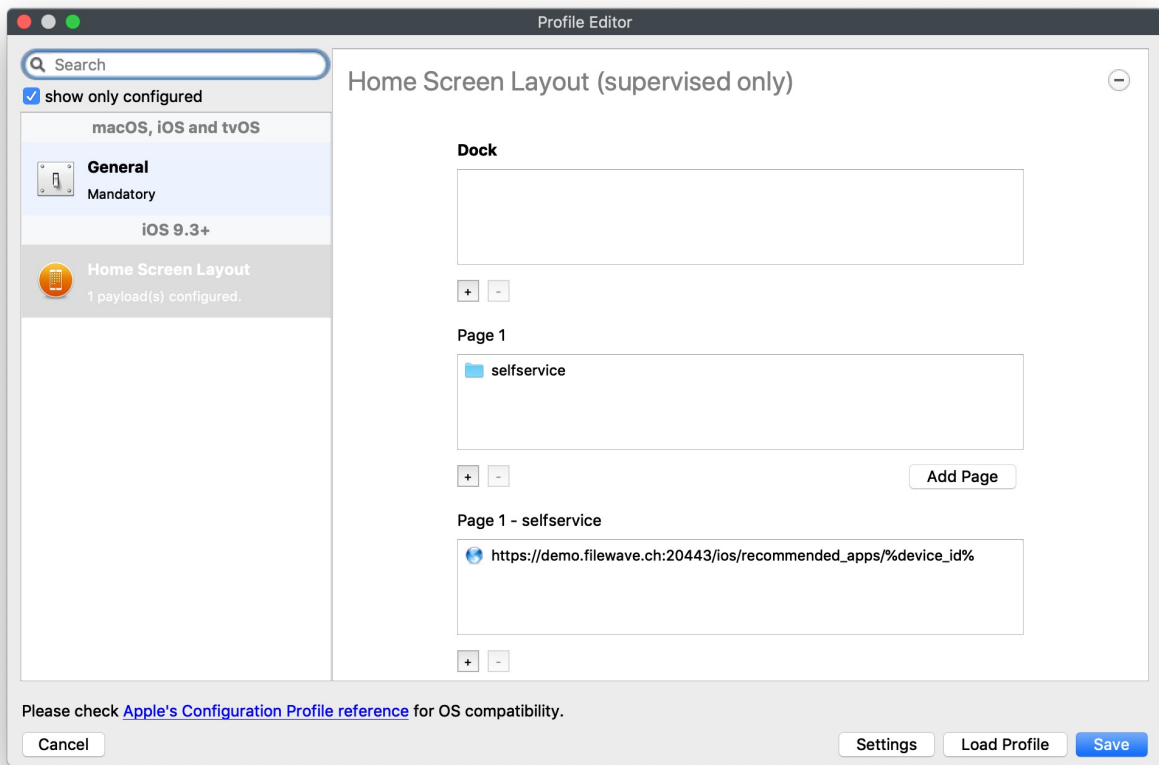

In this example:

```
https://demo.filewave.ch:20445/ios/recommended_apps/6a43efb044bb2e8bd19488cc47cfa62a39cdd04
```

becomes:

```
https://demo.filewave.ch:20445/ios/recommended_apps/%device_id%
```

Inject this into the home screen layout payload you are deploying, instead of an app name, and the App portal will be moved into that folder.
