

# Microsoft Skype Deployment (macOS App)

## Description

Skype is a self-contained application and so deployment is as simple as getting it into the Applications folder.

## Ingredients

- Latest Skype ( <https://www.skype.com/en/get-skype/> )

## Directions

1. Downloaded the latest DMG of Skype
2. Mount and drag into your Applications folder (Don't open it)
3. Drag it into the Filesets windows / or import it
