

What are the System Requirements to run FileWave Imaging ?

The netboot part of FileWave Imaging is supported by a downloadable [FileWave Imaging Appliance](#). Please check the link for updated details and release notes.

This appliance can be run in:

- [vmWare Fusion](#)® for Mac
- [vmWare Player](#)® or [Workstation](#)® for Windows
- [vmWare ESXi](#)®
- [Virtualbox](#)®

It needs 512 MB RAM and between 10 and 50 GB of disk space, depending on the size of the Images you will be deploying. CPU requirements are minimal.
