

FileWave Engage EOL

What

This is a notice that as of FileWave v14.8+ Engage will no longer be supported.

When/Why

FileWave v14.8 should release in Spring 2022. Engage has been at end of life earlier than this, but this will be the first release that will remove the functionality.

How

In 14.8.0 the supporting features will be removed. Inventory queries related to Engage will not work anymore. There are 2 fields specifically: **EngageProfile** and **EngageProfileStatus** will be removed. We have also already removed **EngageX** from the app store.
